the Most Dynamic Part of Warsaw

„For our youngest inhabitants, we are constructing new playgrounds. Soon, in the Henrykowski Park one of the largest rope jungle gyms in Warsaw will be installed”.

**Jacek Kaznowski,
Mayor of the Białoleka
District of Warsaw**

Every year, some 5,000 new inhabitants choose the district of Białoleka for the place of residence, and the largest number of babies are born here. That is why this district is often referred to as the district of the future. Thanks to

its attractive location in green surroundings, a big surface of building land and intense works on local strategies, the district is developing very fast.

Due to good atmosphere for enterprise development, the district attracts numerous new investments. It has many attractive locations to offer. In the nearest future, the authorities of Białoleka are to cooperate with private investors on the development of the Żerański Port and on the construction of a modern shopping center with a multiplex at Modlińska Street. The most important roads and traffic arteries are being built and modernized here. The repairs on the Toruńska Route are in progress, as well as the construction of the North Bridge. Through the new bridge streetcars will get to Tarchomin, one of the largest housing estates. These investments will provide the inhabitants of the district with convenient transport options that will take them to all parts of Warsaw. For the time being, they may com-

mute to the city center comfortably thanks to the Urban Rapid Railway (Szybka Kolej Miejska, or the SKM) launched in March 2010.

We also invest in education, for example we are now modernizing schools in the eastern part of the district and redeveloping kindergartens in Tarchomin. We are also taking care of our inhabitants' physical wellbeing – since June they can spend their free time in the Ceramiczna Park. There, children can consume their energy in the playground or learn how to ride a bicycle, and teenagers can try a special route for skateboards or play basketball, while adults can play boules or exercise in an outdoor gym. It is one of the three gyms available in the district which are becoming more and more popular. The others are situated near playgrounds, including the redeveloped one at Odkryta Street.

In the nearest future, a recreation area will be available at Ruskowy Bród, comprising playgrounds, a fitness trail, a mini skate park and multifunction sports

fields. For those who enjoy professional sports the authorities have prepared a big attraction: from October volleyball fans will be able to watch matches of the BAS Legia Warszawa team (men) in the sports hall at Pluźnicka St and the BAS AZS Politechnika Warszawa (women) competing with other teams in the sports hall at Strumykowa St.

While developing our cultural offer, we take into account the needs of wide audiences. This summer holidays, cinema lovers could watch films in a different way: the Henrykowski Park was changed into an open air movie theater. On Friday evenings, Polish and foreign comedy classics were shown and children could enjoy adventures of the Elmer elephant on playgrounds. We also organize concerts featuring the Białoleka Romantica Orchestra – professional musicians, Polish and international song stars and theatrical performances. And as usual, every year we invite you to have fun outdoor on the New Years' Eve.

IN BRIEF:

- Białoleka is the second largest district of Warsaw (73 km²). It has over 80,000 inhabitants.
- The district, situated on the right bank of the Wisła River, has numerous green areas, e.g. the Choszczówka forests. In the vicinity, there is the Żegrzyński Artificial Lake, which is the favorite destination of inhabitants of Warsaw at weekends.

- It takes about 30 minutes to get from here to the city center by public transport and about 45 minutes to get to the Okęcie Airport. A new airport in Modlin is being built located only some 15 kilometers from the Białoleka Town Hall.
- The authorities of the district focus on infrastructure development. They willingly cooperate with investors within public-private partnership, especially in the field of social infrastructure.
